

Activ8me Public WiFi

Connecting Indigenous communities to the world and core services.

Improving remote Indigenous community access to essential telecommunications services.

COMMUNICATIONS CHALLENGE

- Limited to no mobile coverage or fixed phone line services.
- Cost of deploying infrastructure to small and remote populations.
- Vast geographic distance between communities.
- Harsh environmental conditions.

BENEFITS

- Assisting with employment, cultural, social & education goals.
- Connecting friends, family and visitors.
- Entertainment.
- Government agencies and health professionals.

Activ8me WiFi affordably connects hundreds of remote Indigenous communities to the world and core services.

We provide innovative solutions to deliver reliable voice and data services to any Australian location, including remote offshore islands. By offering an end to end service from community consultation and installation to connection, maintenance and support, we are able to ensure quality and costeffective solutions.

Our next-generation nbn™ satellite broadband solution runs on either solar™ power and high capacity storage batteries or mains power, to provide a reliable shared public Wi-Fi internet connection.

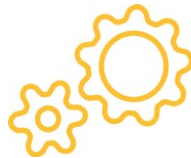

THE SOLUTION

Reliable

Speeds up to 25 Mbps
Supports streaming and VoIP phone calls
Many devices connecting at once

Robust

Withstands harsh environmental conditions
Up-time is always over 98%
Strong antennas covering communal areas

Effective, Proven

Over 15 years' satellite experience
Cost effective installation
